

Inheritance Model

(featuring Abstract Classes and Interfaces)

Justification for subclasses:

1. One or more unique private instance variables and/or,
2. One or more new public or private class methods and/or,
3. One or more overridden class methods

Collections:

1. `MyDevice[] devices = new MyDevice[10];`
2. `MyPhone[][] devices = new MyPhone[10][10];`
3. `ArrayList<Shippable> devices = new ArrayList<Shippable>();`
