## “The Elegant Universe I” Video Paper

---

After watching Part I of the movie “The Elegant Universe”, you will write a paper according to the following guidelines:

1. The paper is at least 2 pages in length and is in MLA format.
2. The first paragraph should address what you learned about one of the physicists introduced in the movie. Specifically, address the following: when he was born, what his contribution to science was, and why you picked him.
3. The second and third paragraphs should address new physics content knowledge that you learned from the movie.
4. The fourth paragraph should address how the video changed/altered your view of science and your view of “reality.”
5. The fifth paragraph should be a commentary about what you thought about the video as a whole.
6. One student-drawn color picture directly related to the video should be included directly beneath the paragraph that references it. The dimensions of the picture should be no more than 2” tall by 7” wide.
7. Your “movie notes” page should be stapled to the back of your paper. The note page **does not** count as one of the three pages of typed text.
8. There will be a deduction of 2 points for each typographical error or misspelling.
